

Previous Dante Accelerator Driver for Win version information

V2.0.3

Fixed Bug

- Solved a problem in which a message “Setup Failed” might be displayed during installation of the driver on Windows 10.

Specification Changes

- Changed the system requirements. One of the following 64-bit operating systems is required.
- Windows 10, Windows 8.1, or Windows 7 SP1 (64-bit).

V2.0.2

Fixed Bug

- Solved some minor problems.

V2.0.1

Fixed Bug

- Solved a problem in which an error message was displayed and the Dante Accelerator Driver could not be installed. Updating to V2.0.1 is not necessary if you are already using V2.0.0 since only the installer was fixed and the driver was not changed.

V2.0.0

Specification Changes

- Now supports Dante Redundancy. (The secondary port became available.)

V1.0.0

- 1st. Release Version.
